DISCUSSION:

The BPT ASR facility was added to the Federal Agency Hazardous Waste Compliance Docket under the reporting mechanism Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) section 103 in June 2017. The facility was listed on the docket due to a diesel fuel spill at the facility, or a potential release of hazardous substance that occurred at the facility during cleanup. In accordance to CERCLA section 120(d) the facility must provide information necessary to assess the threat pose to human health and the environment to the Environmental Protection Agency.

The BPT ASR is a former surveillance radar facility located on the Beaumont Regional Airport in Beaumont, Texas. The site has been decommissioned and demolished. Surface soil samples were collected and analyzed for total lead after cleanup. The confirmatory soil sample results did not exceed cleanup level for residential lead of 400 mg/kg.

A decision of "No Further Remedial Action Planned" (NFRAP) under Superfund will be entered in SEMS, and the site will be referred to the State and FAA. Other actions maybe appropriate under State Authorities and FAA.
